WHAT IS CROWDFUNDING?

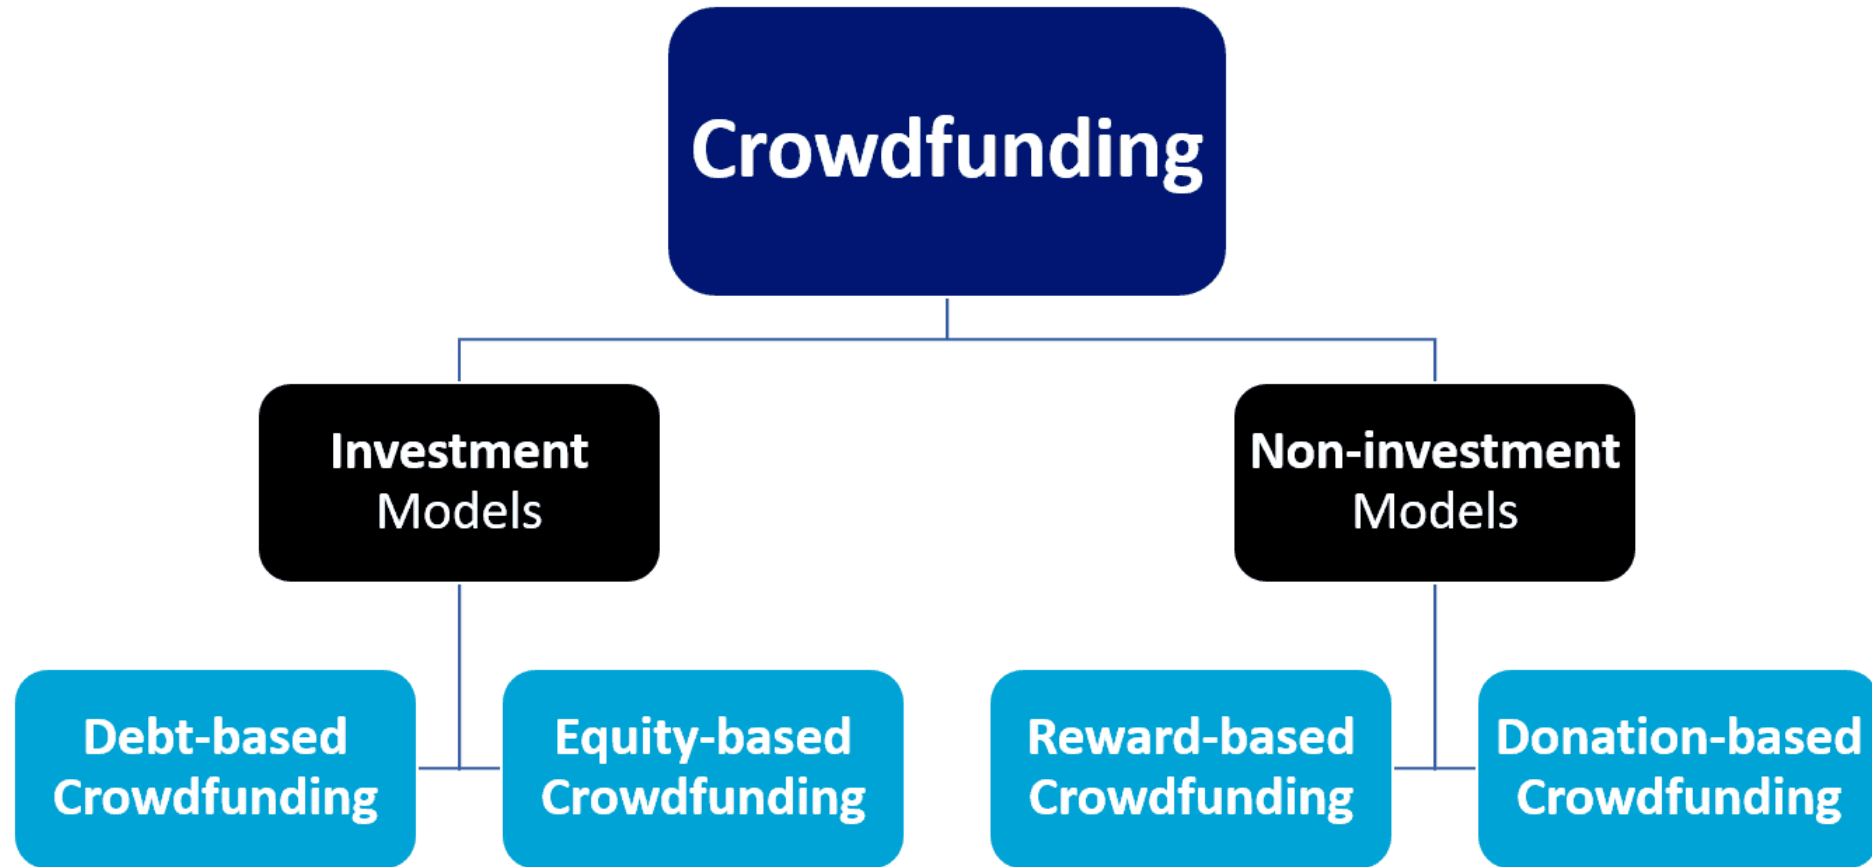

Crowdfunding refers to how the business can raise capital from many individuals beyond friends, family, relatives, and customers by posting the project details on websites and other social media platforms. It is the source of finance that does not involve banks or other financial institutions.

HOW DOES IT WORK?

- ❑ The entrepreneur who wants to raise funds through crowdfunding and the small investors interested in funding new businesses and business ideas must register at the official crowdfunding websites. These websites are the medium between investors and entrepreneurs.
- ❑ The entrepreneur has to put the concept and projections of the business through the crowdfunding website so potential investors can decide whether to invest.
- ❑ Along with the idea and forecasts, the entrepreneur has to quote the minimum amount the investor can invest. The minimum amount can be as low as \$10.
- ❑ The potential investor needs to show interest in investing, the minimum amount it can sponsor, and the procedure and details of the investments.
- ❑ If overapplications are received, they will repay the excess money to the investors.
- ❑ Once the funds are raised and received, the entrepreneur pays fees to the crowdfunding websites. The cost is based on the percentage of fundraising.
- ❑ The profit generated from the business needs to be shared with the investors by return on investment.

CROWDFUNDING MODELS OR TYPES

ABOUT US

We value knowing our clients by and by, so our clients feel certain with us. Individual connections are significant in our business. Accounts are proposed to both confidential financial backers and expert enterprises. When exchanged, our guardianship administrations guarantee settlement, security and manage profit/coupon installments and warning of corporate activities. Move your ventures to us, we have a committed group.

OUR VISION

Our vision for what's in platform is to keep enhancing clients, while limiting the minimizing the risks in Crowdfunding and cross-line Payment. We mean to do this by severe adherence to worldwide accepted procedures in the business, growing the quantity of tradable monetary forms and conveying client driven items along with the foundation and the controls to help them.
